**Centro de Animais  
(Animal Shelter)**

**GUADI** is a non-profit organization, created in 2005, from the goodwill of (a few concerned people), worried about the protection and well-being of abandoned or mistreated animals in our municipality.

Since then, we've been able to take action on those concerns, by helping many stray animals with daily treatments, neutering and spaying and promoting responsible adoption.

Above all this we continually support the recuperation of the trans municipal kennel from state of disarray it was in.

2006

On an initial stage, and with the support of the VRSA municipality and several other entities, we were able to improve the existing facilities.

Build new ones and invest in healthcare, supplying medication, desparasitation, infections disease testing, surgical supplies and anesthetics used in neutering and spaying.

Currently we have a protocol with the VRSA municipality, under which a large part of our activity is developed.

In this way, we can accomplish one of our goals, which we are very proud of:  
**“to find owners for many pets”.**
